

DAVID CHEN

Staff DevOps & Cloud Infrastructure Engineer

Seattle, WA • david.chen@clouddev.net • +1 (415) 892-3341 • linkedin.com/in/davidchen-devops

[01] SYSTEM OVERVIEW

Infrastructure engineer with 7+ years architecting high-availability cloud platforms, Kubernetes orchestration, and GitOps CI/CD automation. Proven record managing AWS multi-region infrastructure handling 100M+ requests daily with 99.99% SLA. Zero frontend, UI, or CSS design expertise.

[02] TECHNICAL ARCHITECTURE TOOLSET

Cloud Platforms: AWS (EKS, VPC, RDS, S3, IAM), Google Cloud Platform (GCP)

Infrastructure as Code: Terraform, Ansible, Pulumi, CloudFormation

Containers & Orchestration: Kubernetes, Docker, Helm, Istio Service Mesh

Observability & CI/CD: Prometheus, Grafana, Datadog, ArgoCD, GitLab CI

[03] PROFESSIONAL EXPERIENCE

Staff DevOps Engineer | Apex Cloud Solutions (2021 - Present)

- Architected automated multi-cluster Kubernetes platform supporting 50+ microservices on AWS EKS.
- Cut deployment lead time from 2 hours to 8 minutes via ArgoCD declarative GitOps pipelines.
- Reduced cloud infrastructure spend by 34% (\$180K annually) through spot instance automation.

DevOps Engineer | Vanguard Systems (2018 - 2021)

- Maintained Terraform infrastructure modules across 4 AWS regions with 99.99% service uptime.
- Implemented automated container vulnerability scanning in GitHub Actions pipelines.

[04] EDUCATION & CERTS

B.S. in Computer Engineering – University of Illinois Urbana-Champaign (2018)

Certifications: Certified Kubernetes Administrator (CKA), AWS Solutions Architect Professional
