PROFESSIONAL SUMMARY

Senior DevOps & Cloud Architect with 7+ years designing multi-region cloud infrastructure, Kubernetes clusters, and zero-downtime deployment pipelines. AWS Certified Solutions Architect Professional.

CORE COMPETENCIES & SKILLS

Cloud & Infrastructure: AWS [EKS, RDS, S3, CloudFront], GCP, Terraform, Ansible, Pulumi
Containers & Orchestration: Kubernetes, Docker, Helm, Istio Service Mesh
CI/CD & Observability: GitHub Actions, ArgoCD, Prometheus, Grafana, Datadog

EXPERIENCE

Staff DevOps Engineer - Apex Cloud Solutions [Seattle, WA] 2021 - Present

- * Architected multi-cluster Kubernetes platform supporting 60+ production microservices.
- * Implemented GitOps deployment workflows via ArgoCD, cutting deployment time to 8 mins.
- * Reduced AWS compute spend by 34% [\$180K/year] using automated spot instance groups.

DevOps Engineer - Vanguard Systems [San Jose, CA] 2018 - 2021

- * Maintained high-availability AWS infrastructure with Terraform, achieving 99.99% uptime.
- * Standardized automated container security scanning in CI/CD pipeline.

EDUCATION

B.S. in Electrical & Computer Engineering - University of Washington [2014 - 2018]
